

جناب آقای دکتر سید محسن تقوی

ریاست محترم دانشکده کشاورزی

با سلام و احترام؛

به استحضار می‌رساند پروپوزال کتاب اینجانب **Dr. Hamid Reza Pourghasemi** تحت عنوان:

"Computers in Earth and Environmental Sciences"

مورد پذیرش انتشارات ELSEVIER قرار گرفته و در مرحله دعوت از همکاران مختلف از دانشگاه‌های دنیا و ایران برای مشارکت و نوشتن فصل‌هایی از آن می‌باشد (محتوی کتاب به پیوست ارسال می‌گردد).
مراتب جهت استحضار جناب‌عالی و در صورت امکان به منظور اطلاع‌رسانی و درج در صفحه رسمی دانشکده کشاورزی و دانشگاه شیراز به حضورتان ارسال می‌گردد.٪

با تجدید احترام

دکتر حمیدرضا پورقاسمی

عضو هیئت علمی بخش مهندسی منابع طبیعی و محیط زیست دانشکده کشاورزی، دانشگاه شیراز

مهلت ارسال چکیده فصل کتاب: ۱۱ آبان‌ماه ۱۳۹۹

مهلت ارسال کامل فصل کتاب: ۱۱ اسفندماه ۱۳۹۹

PUBLISHING AGREEMENT

AGREEMENT made this 16th day of September, 2020, by and between **Elsevier Inc.** with offices at 50 Hampshire St., 5th Floor, Cambridge, MA 02139, USA (the “Publisher”), and

Hamid Reza Pourghasemi
Shiraz University
7177165186, Shiraz,
Islamic Republic of Iran

(the “Editor”).

WHEREAS, the Work (defined below) will be composed of a number of chapters or articles (the “Contributions”) written by a number or a group of contributors (the “Contributors”); and

NOW, THEREFORE, the parties agree to the publication by the Publisher of that certain work tentatively entitled **COMPUTERS IN EARTH AND ENVIRONMENTAL SCIENCES**, as more fully described below upon the terms and conditions set forth below:

1. Manuscript Delivery

- a. Delivery obligations. The Editor will deliver to the Publisher on or before **July 1, 2021**, time being of the essence, a final complete manuscript in the English language, in the format and with all deliverables noted on Annex 1 (the “Work”), in form and content consistent with the obligations noted herein and satisfactory in the Publisher’s sole discretion. The Editor will retain a complete copy of all deliverables required to be delivered to the Publisher under this Agreement.
- b. Permissions. If the Editor or the Contributors incorporate in the Work any material from third parties, the Editor or the Contributors will have procured prior to the date of manuscript delivery specified in Section 1(a), at the Editor’s or Contributor’s expense, permission in writing from each copyright holder of such material to use and reprint such material in the Work consistent with the terms of the rights granted pursuant to Section 3. The Editor or the Contributors will fully acknowledge all previously published material in the Work. If the Editor or the Contributors do not obtain such permissions in a timely manner or in satisfactory form, the Editor will cooperate with the Publisher in identifying substitute material and revising the Work accordingly, and the Editor or the Contributors will obtain the requisite substitute permissions. The Editor will also deliver with the manuscript a permissions log as noted in Annex 1.

Computers in Earth and Environmental Sciences

Hamid Reza Pourghasemi

Department of Natural Resources and Environment Engineering, College of Agriculture, Shiraz University, Shiraz, Iran. Email: hr.pourghasemi@shirazu.ac.ir; hamidreza.pourghasemi@yahoo.com

Contents

Part-I - Natural Hazards

1. Landslides (susceptibility, hazards, and risks)
2. Earthquakes in Iran and the wider world
3. Snow avalanches
4. Flood spatial modeling
5. Drought and its spatial-temporal variability
6. Forest fires and hazard management
7. Land subsidence, mapping, and monitoring

Part-II - Environmental Hazards

8. Greenhouse gases and global warming
9. Soil erosion (water and wind)
10. Soil and water pollution
11. Land degradation
12. Heavy metals
13. Air quality
14. Landfill waste
15. Environmental and biological hazards

Part-III - Advanced tools and technologies in risk management

16. Artificial intelligence
17. Machine learning and meta-heuristic algorithms
18. Multi-criteria decision-making tools
19. GIScience
20. Remote sensing and satellite imageries
21. Aerial robotics including unmanned aerial vehicles (UAVs)
22. Web-GIS and hazard management
23. Land-based sensors
24. Social media and mobile apps in risk management

- 25. Internet of things (IoT), and analyzing big data (BD)
- 26. Early warning systems
- 27. Open source software tools

Part-IV - Computer and environmental future challenges

- 28. Detection of change of vegetation cover
- 29. Urban sprawl
- 30. Surface and groundwater vulnerability
- 31. Species distributed modeling
- 32. Wind farm site selection
- 33. Digital soil mapping-DSM
- 34. Precision agriculture

- **Appendix**
- **Index**
- **Abbreviations**

Key points:

- 1) **Each section consisted of introduction, materials and method, results, discussion, conclusion, and references;**
- 2) **Overall, we will manage 7-10 papers in each part; each article may be about 10-15 pages with roughly 10,000-12,000 words.**

Abstract Deadline: November 1, 2020

Full chapter deadline: March 1, 2021
